## **Important Tips for Product Activation**

1. Beginning with Pervasive PSQL v10.13 (e-commerce and trials) and Pervasive PSQL v10.3 (shrink wrap), Server and Workgroup products use Product Activation to validate licenses. Beginning with Pervasive PSQL v11, all Server and Workgroup products use Product Activation.
2. Always use one product key per installation.
3. Always deactivate keys before uninstalling Pervasive PSQL.
4. Always deactivate keys before making *any* changes to the hardware. Versions of Pervasive PSQL that use Product Activation check hardware configurations during engine startup. If the hardware configuration has been changed, PSQL may disable the product key and it will be impossible to activate the database.
5. A product key can be activated up to 5 times and deactivated up to 5 times.
